KSW-NAVTEX

The screenshot displays the KSW-NAVTEX web interface. The top navigation bar includes 'Database', 'Network Architecture', 'GMDSS Server Management', 'Network Supervision', 'User Database', and 'Aud Arc'. The main content area is titled 'NAVTEX Database > NAVTEX Record'. It features an 'Actions' section with buttons for 'Import', 'Export', 'Preview', and 'Send Now'. Below this is the 'Identification' section with fields for 'Name', 'Status', 'Transmitter Identification (B1)', 'Subject Identification (B2)', 'Message ID (B3B4)', and 'Message Priority'. A dropdown menu for 'Subject Identification (B2)' is open, showing options from 'Z - No message on hand' to 'Z - Special Service allocation'. The 'Scheduler Generation Rules' section includes fields for 'First Transmission' (311200 UTC JAN 19), 'Last Transmission', 'Transmission Slots', 'Transmission Period', and 'Transmitter'. The 'Message content' section provides instructions for entering specific markers like TIME, HEADER, and TRANSMITTER.
