Kenta Transceivers

FOR MARITIME COMMUNICATION
BASE STATION RADIO
IP BASED

VHF SERIES

Since 1990, customers have relied on Kenta radio communication solutions for their maritime applications. This vast experience in the coastal radio market combined with Nautel's industry-leading quality, solid-state reliability, and 24/7 customer support, creates an exceptional VHF series of transceivers dedicated to maritime operation.

Efficient

Specially designed for maritime coast station installations fulfilling GMDSS requirements. These transceivers works in the maritime VHF frequency range from 156 MHz to 162 MHz and can deliver up to 100 W RF signal in transmission mode.

Meets requirements according to EN 301 929V2.11*.

Kenta's transceivers are designed and manufactured for 24/7 operation in harshest environment.

Customizable

All VHF Transceivers are designed in two versions: with or without local mode.

Fully IP Based, Voice Over IP (VoIP) is compliant with the EUROCAE ED137 standard.

The solution can be completely customized with additional options for archiving/recording.

Easy to install in a standard 19" cabinet.

Remote operation in a control center via a Voice Console and DSC Console.

Kenta consoles work with a standard web browser.

Optional Semi-Duplex or Full-Duplex operation on a single antenna.

Affordable

Kenta will never compromise between safety and price. Kenta is proud to provide an affordable series of robust and reliable VHF Transceivers that meet the requirements our customer's demand.
